4. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive SEO audit of **www.ai-automation-station.com** for a **Creator education + paid community (Skool, $29/$49/$89 per month) with YouTube channel and written guides** site, generated on October 28, 2026. Findings combine technical, content, schema, performance, visual, and search-readiness evidence as available.

76/100

SEO HEALTH SCORE

Critical Issues Found:

1. 173 of 220 /watch/ pages are thin (<300 words, median ~210); only 30 have transcripts and they sit in a collapsed <details>
2. Watch pages cannibalize guides: searchTitle overrides in src/watch-notes.js copy guide head terms (HeyGen exact duplicate; OpenCode, 9Router, Vapi near-duplicates)
3. Brand entity is weak: 'AI Income Lab' is absent from schema, Organization has no logo, and other Skool communities use the same name
4. Internal linking is one-directional: 1 of 220 watch pages links a topic hub, only 3 of 24 guides link their hub, and the 'earn with AI' cluster has no hub or pillar
5. Watch pages load the full YouTube player (~1.1 MB) on page load instead of a click-to-load facade

Quick Wins:

1. Add Organization logo + alternateName 'AI Income Lab' and fix WebSite.alternateName in index.html
2. Retitle /watch/pMLyxz6Dyt4 and other searchTitle overrides that copy guide titles (src/watch-notes.js)
3. Add topic level to watch-page breadcrumbs and a hub link (src/archive.js)
4. Write descriptive alt text for the 9 guide hero diagrams (public/guides/*.html)
5. Reuse the homepage YouTube facade on /watch/ pages (src/archive.js:261, pattern from src/main.jsx:268)

2. Audit Categories

2.1 Technical SEO

Score: 88/100

What Works

- All 274 crawled pages return 200; 0 broken internal links; self-referencing canonicals everywhere
- 308 redirects to https://www; /guides/x -> .html, trailing slash and /index.html normalized
- Real 404s with noindex for unknown paths, video IDs and topics
- Both sitemaps valid; video sitemap has all required video: tags; IndexNow wired into scripts/prerender.js
- Brotli, HTTP/2, immutable hashed assets, HSTS, nosniff, XFO DENY

Findings

Most /watch/ pages are thin Medium

173 of 220 under 300 words; only YouTube description is unique on most.

Recommendation: Finish transcript backfill; surface summary/first transcript paragraphs outside <details> in renderWatch (src/archive.js).

23 /videos URLs in sitemap.xml lack <lastmod> Low

29 of 52 main-sitemap URLs have lastmod.

Recommendation: Emit newest upload date per page in renderPageSitemap() (src/archive.js).

Homepage <lastmod> stale and hard-coded Low

Sitemap says 2026-10-16; homepage shows a 2026-10-27 video.

Recommendation: Generate at build time in public/sitemap.xml pipeline.

Two-hop redirect chains Low

http apex -> https apex -> www; /guides/x/ -> /guides/x -> /guides/x.html.

Recommendation: Add direct rules in vercel.json redirects.

CSP is Report-Only with no report endpoint Low

Content-Security-Policy-Report-Only only.

Recommendation: Add report-to, review, then enforce in vercel.json.

2.2 Content Quality

Score: 62/100

What Works

- Guides have bylines, published/updated dates, primary sources, honest caveats and no income promises
- Guides average ~1,570 words with readability 51-67, quick answers, tables, FAQs
- Best watch pages (e.g. /watch/TuVL2x6IfDk) add chapters, build notes, fact-checks and transcripts

Findings

Thin, templated watch pages High

Median watch page ~210 words; /watch/wL6bjqaUcd8 (117 words) is YouTube description + generic CTA.

Recommendation: Transcripts + notes for all 220 (scripts/fetch-transcripts.mjs, src/watch-notes.js); noindex,follow pages with neither until enriched.

No standalone author/About page Medium

Bylines and Person schema point to /#about on a mixed-purpose homepage; YMYL-adjacent money guides.

Recommendation: Create /about.html with bio, sameAs, editorial process; point bylines there.

Make-money guides lack first-hand proof and sources Medium

make-money-with-ai-no-experience and ai-side-hustles have no external links; 5 guides overlap on 'make money with AI'.

Recommendation: Add one documented case, sources and a comparison table per guide; de-stuff keyword headings.

14 of 24 guides lack a quick-answer opener Medium

ai-automation.html shows the strong pattern.

Recommendation: Add 40-60 word answer after the H1.

Transcripts are raw auto-captions Low

'codeex', 'Versal' on /watch/TuVL2x6IfDk.

Recommendation: Add a term-correction pass to scripts/fetch-transcripts.mjs.

2.3 On-Page SEO

Score: 74/100

What Works

- No missing/duplicate meta descriptions; one H1 per page
- Descriptive anchor text sitewide; Skool CTA on 271 of 274 pages
- make-money-with-ai-fast observed at #1 in sampled SERP

Findings

Watch pages cannibalize guides High

Identical title on /guides/heygen-ai-avatar-tutorial.html and /watch/pMLyxz6Dyt4; near-duplicates for OpenCode, 9Router, Vapi.

Recommendation: Retitle watch pages as video walkthroughs in src/watch-notes.js; add a test blocking guide/watch title collisions.

Internal links don't connect clusters High

1 of 220 watch pages links a topic hub; 66 watch pages map to no hub; only 3 of 24 guides link their hub; 'earn with AI' cluster has no hub/pillar.

Recommendation: Add topic level to watch breadcrumbs (src/archive.js ~230, ~259), a business topic in src/topics.js, and guide<->hub links.

Small-business guide targets the wrong intent High

Head term SERP is agency service pages (4/5); guide is written for sellers.

Recommendation: Retitle to the seller query in public/guides/ai-automation-services-small-business.html.

Thin topic hubs with short titles Medium

/videos/n8n title 'n8n videos | Mike Holp' (22 chars), H1 'n8n'.

Recommendation: 55-65 char titles, descriptive H1s and 150-300 word intros in src/topics.js.

Over-broad guide-routing regex Medium

codex|open code|claude code sends 13 of 15 Claude Code videos to the Codex guide.

Recommendation: Order specific patterns before broad ones in src/archive.js.

2.4 Schema / Structured Data

Score: 78/100

What Works

- No invalid JSON-LD; consistent @id graph (#mike, #org, #website) across pages
- VideoObject complete on 220 watch pages, 195 with Clip key moments
- Article complete on all 24 guides; BreadcrumbList on 246 pages

Findings

Organization has no logo High

No logo/image on #org or Article publishers; no logo file in public/.

Recommendation: Add square PNG logo (>=112px) and reference from index.html.

'AI Income Lab' missing from schema High

Organization named 'AI Automation Station' with no alternateName; WebSite.alternateName is 'Mike Holp'.

Recommendation: Add alternateName ['AI Income Lab'] to #org and fix WebSite.alternateName in index.html.

No Product/Offer/Course markup for the paid community Medium

Visible $29/$49/$89 tiers and five courses are unmarked.

Recommendation: Add Product + Offers and ItemList of Course (snippet B in findings/schema.md).

Inconsistent Person URL and sameAs Medium

Person url is / on home/watch vs /#about elsewhere; YouTube missing from Person sameAs.

Recommendation: Normalize in index.html and src/archive.js:226; add YouTube, worksFor.

2.5 Performance (CWV)

Score: 92/100

What Works

- All tested URLs pass lab LCP/CLS/TBT on mobile and desktop; TTFB <60 ms
- Lighthouse SEO and accessibility 100 on every tested page
- Third-party tags gated behind consent; homepage uses a YouTube facade

Findings

Watch pages load the full YouTube player eagerly High

~1.1 MB from youtube-nocookie.com; mobile LCP 2.12 s, the slowest tested.

Recommendation: Reuse the homepage facade (src/main.jsx:268) in src/archive.js:261; preconnect i.ytimg.com.

Meta pixel adds ~279 KB and ~250-300 ms blocking after consent Medium

Not visible to Lighthouse, which runs pre-consent; main INP risk.

Recommendation: Defer injection to idle in loadMarketingTracking (src/tracking.js); consider Conversions API.

No real-user CWV monitoring Medium

No CrUX key, no @vercel/speed-insights; analytics absent on guides and watch pages.

Recommendation: Add Speed Insights and analytics across all templates.

Late font discovery on guide/watch pages Low

CLS 0.065 on watch mobile from fonts declared only in reading.css.

Recommendation: Preload the two WOFF2 fonts in those heads.

2.6 AI Search Readiness

Score: 74/100

What Works

- All 15 tested AI/search crawler UAs receive identical 200 responses
- Quality llms.txt; server-rendered HTML; dated, sourced guides

- ai-automation.html is a model citable page (quick answer, FAQ, table, 17 sources)

Findings

Brand name collides with other 'AI Income Lab' communities High

Other Skool groups use the same name; observed rankings varied between checks, and AI summaries can blend them. Mike's Skool slug is ai-automation-station-7346.

Recommendation: Pair the name with 'by Mike Holp' in titles, llms.txt and Skool description; add schema alternateName.

Few independent third-party mentions High

Only checkthecourse.com found as an independent source.

Recommendation: Earn mentions on Reddit, podcasts, collaborator channels; Wikidata once sources exist.

No /llms-full.txt or About page Low

Both return 404.

Recommendation: Add /about.html; optionally enrich llms.txt with per-link descriptions and topic hubs.

2.7 Images

Score: 72/100

What Works

- All 587 images have width/height; 563 lazy-loaded
- Empty alt on ~490 thumbnails/avatars beside text is correct decorative usage

Findings

Guide hero diagrams have empty alt Medium

9 informative hero images in public/guides/*.html have alt="".

Recommendation: Write descriptive alt text and add an alt check to src/guide-seo.test.js.

Mostly JPG/PNG Low

403 jpg, 128 png, 56 webp (many are YouTube-hosted thumbnails).

> **Recommendation:** Use WebP/AVIF for self-hosted images.

---

3. Action Plan

Phase 1: Critical Fixes Week 1

- Brand entity: logo + alternateName 'AI Income Lab' + Person sameAs/url fixes in index.html
- Retitle watch pages that duplicate guide titles (src/watch-notes.js) and add a collision test
- YouTube click-to-load facade on /watch/ pages (src/archive.js)
- Add topic level to watch breadcrumbs and hub links (src/archive.js)

Phase 2: High-Impact Improvements Weeks 2-3

- Finish transcript backfill; surface summary outside <details>; noindex unenriched watch pages
- Create 'earn with AI' topic hub + pillar guide; link guides <-> hubs; fix guide-routing regex
- Retitle small-business guide for the seller query
- Create /about.html and point bylines and Person schema there
- Alt text on 9 guide hero diagrams

Phase 3: Content & Authority Month 2

- Add sources, case studies and tables to the make-money guides
- Quick-answer openers on remaining 14 guides; question-style H2s
- Product/Offer/Course schema for the community
- Expand topic hub intros/titles in src/topics.js
- Third-party mentions and backlink outreach

Phase 4: Monitoring & Iteration Ongoing

- Connect Google Search Console / CrUX API to the SEO toolkit; add Vercel Speed Insights
- Defer Meta pixel; consider Conversions API
- Create a drift baseline and re-audit monthly
- Sitemap lastmod generation; redirect chain cleanup; enforce CSP

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)
